- 10—Japan's 2,136 Jōyō Kanji requires one Extension B ideograph

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?

**01—**

**02—**

**03—**

**04—**

**05—**

**06—**

**07—**

**08—**

**09—**JIS X 0213:2004 requires 303 Extension B ideographs

**10—**Japan's 2,136 Jōyō Kanji requires one Extension B ideograph

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?

**01—**

**02—**

**03—**

**04—**

**05—**

**06—**

**07—**

**08—**GB 18030 certification without PUA requires six Extension B ideographs

**09—**JIS X 0213:2004 requires 303 Extension B ideographs

**10—**Japan's 2,136 Jōyō Kanji requires one Extension B ideograph

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?

**01—**

**02—**

**03—**

**04—**

**05—**

**06—**

**07—China's 8,105 hànzì set requires 196 Extension B through E ideographs**

**08—GB 18030 certification without PUA requires six Extension B ideographs**

**09—JIS X 0213:2004 requires 303 Extension B ideographs**

**10—Japan's 2,136 Jōyō Kanji requires one Extension B ideograph**

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?

**01—**

**02—**

**03—**

**04—**

**05—**

**06—**Hong Kong SCS-2008 requires 1,702 Extension B & C ideographs

**07—**China's 8,105 hànzì set requires 196 Extension B through E ideographs

**08—**GB 18030 certification without PUA requires six Extension B ideographs

**09—**JIS X 0213:2004 requires 303 Extension B ideographs

**10—**Japan's 2,136 Jōyō Kanji requires one Extension B ideograph

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?

**01—**

**02—**

**03—**

**04—**

**05—IVS support requires the 240 VSes in Plane 14**

**06—Hong Kong SCS-2008 requires 1,702 Extension B & C ideographs**

**07—China's 8,105 hànzì set requires 196 Extension B through E ideographs**

**08—GB 18030 certification without PUA requires six Extension B ideographs**

**09—JIS X 0213:2004 requires 303 Extension B ideographs**

**10—Japan's 2,136 Jōyō Kanji requires one Extension B ideograph**

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?

**01—**

**02—**

**03—**

**04—As of Unicode Version 6.0, there are more characters outside the BMP**

**05—IVS support requires the 240 VSes in Plane 14**

**06—Hong Kong SCS-2008 requires 1,702 Extension B & C ideographs**

**07—China's 8,105 hànzì set requires 196 Extension B through E ideographs**

**08—GB 18030 certification without PUA requires six Extension B ideographs**

**09—JIS X 0213:2004 requires 303 Extension B ideographs**

**10—Japan's 2,136 Jōyō Kanji requires one Extension B ideograph**

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?

**01—**

**02—**

**03—Modern OSes and applications support code points outside the BMP**

**04—As of Unicode Version 6.0, there are more characters outside the BMP**

**05—IVS support requires the 240 VSeS in Plane 14**

**06—Hong Kong SCS-2008 requires 1,702 Extension B & C ideographs**

**07—China's 8,105 hànzì set requires 196 Extension B through E ideographs**

**08—GB 18030 certification without PUA requires six Extension B ideographs**

**09—JIS X 0213:2004 requires 303 Extension B ideographs**

**10—Japan's 2,136 Jōyō Kanji requires one Extension B ideograph**

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?

**01—**

**02—Almost all emoji—and all new ones—are encoded in Plane 1**

**03—Modern OSes and applications support code points outside the BMP**

**04—As of Unicode Version 6.0, there are more characters outside the BMP**

**05—IVS support requires the 240 VSes in Plane 14**

**06—Hong Kong SCS-2008 requires 1,702 Extension B & C ideographs**

**07—China’s 8,105 hànzì set requires 196 Extension B through E ideographs**

**08—GB 18030 certification without PUA requires six Extension B ideographs**

**09—JIS X 0213:2004 requires 303 Extension B ideographs**

**10—Japan’s 2,136 Jōyō Kanji requires one Extension B ideograph**

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?

**01**—The BMP is effectively full

**02**—Almost all emoji—and all new ones—are encoded in Plane 1

**03**—Modern OSes and applications support code points outside the BMP

**04**—As of Unicode Version 6.0, there are more characters outside the BMP

**05**—IVS support requires the 240 VSes in Plane 14

**06**—Hong Kong SCS-2008 requires 1,702 Extension B & C ideographs

**07**—China’s 8,105 hànzì set requires 196 Extension B through E ideographs

**08**—GB 18030 certification without PUA requires six Extension B ideographs

**09**—JIS X 0213:2004 requires 303 Extension B ideographs

**10**—Japan’s 2,136 Jōyō Kanji requires one Extension B ideograph

# 2015 Top Ten List: Why Support Beyond-BMP Code Points?
