# Issues resolved

This section provides information on the following issues resolved in the latest FrameMaker (2017 release) Update 1.

1. Graphics toolbar cannot be docked horizontally.  
(Ref - **1994**)
2. User interface issues noticed in the Graphics toolbar.  
(Ref - **2191, 1901, 2440, 2439**)
3. The paragraph tags cannot be renamed.  
(Ref - **2132, 2363**)
4. FrameMaker does not allow customization of the Welcome screen.  
(Ref - **1358**)
5. Adding or editing a variable is done through a modal dialog.  
(Ref - **2458**)
6. For a particular case, FrameMaker crashes when a .fm file saved in 2017 format is saved again in .fm 2015 format.  
(Ref - **2366**)
7. Conditionalized index entry does not hide when the content (containing the index entry) is hidden using filters in responsive HTML5 output.  
(Ref - **2367**)
8. Incorrect FrameMaker Object Model version number appears in ExtendScript Toolkit.  
(Ref - **2316**)
9. Some minor issues noticed in running 508 compliance check on responsive HTML5 output.  
(Ref - **2274**)

10. In some cases, GDI leak is noticed on using the Set Color feature for any graphic object.  
(Ref - **2361**)
11. When the Show Default Topic option in the Ocean layout is turned off, then no topic is displayed when a link is clicked from the TOC.  
(Ref - **294**)
12. In the Indigo layout, tooltip of the remove favorite button is not correctly worded.  
(Ref - **386**)
13. Conditional Tag menu option is not present in the Insert menu in unstructured mode.  
(Ref - **2252**)
14. Search is not triggered on pressing the Enter key in the Repository Manager pod.  
(Ref - **2343**)
15. Height of the Conditional Text pod cannot be reduced beyond a certain limit.  
(Ref - **2177**)
16. Double separator appears under the Graphics > Tools menu.  
(Ref - **2155**)
17. Cannot insert images of CGM format.  
(Ref - **2183**)
18. Redundant alert messages shown on removing structure from a document.  
(Ref - **2158**)
19. Animated GIF does not render correctly in HTML5 output.  
(Ref - **1877**)
20. The Show Element Context dialog is not resizable.  
(Ref - **2131**)
21. While working on extended monitors, the command search pop-up does not appear as expected.  
(Ref - **2510**)
22. In the paragraph and character designers, the Language selection drop-down displays the language names in their localized languages.  
(Ref - **2420**)
23. In some cases, redundant link tag entries found in responsive HTML5 output.  
(Ref - **2411**)

24. The File Open dialog does not list all supported file formats.  
(Ref - **2448**)
25. When Conditional Tags pod is aligned to the bottom of the screen, the last condition in the scrollable list is not displayed.  
(Ref - **2401**)
26. Unable to expand floating pods.  
(Ref - **1852**)
27. Missing scrollbar noticed when responsive HTML5 output generated using the Indigo layout is viewed in Safari (Sierra OS).  
(Ref - **2368**)
28. In some cases, FrameMaker's user interface does not render correctly on high-resolution monitors where the scaling is set to 125% or 175%.  
(Ref - **2502**)
29. The Define Color Views dialog appears distorted on a high-resolution monitor.  
(Ref - **2364**)
30. The Equations editor does not scale appropriately on a high-resolution monitor.  
(Ref - **2370**)
31. Erroneous strings noticed in some localized user screens.  
(Ref - **1795**)
32. When a link of responsive HTML5 output is clicked from Google search results, the content is shown without layout.  
(Ref - **2546**)
33. In the Basic HTML output, no index.html file is generated.  
(Ref - **239**)
34. Closing the advance search dialog in Repository Manager results in a crash.  
(Ref - **2233**)
35. Description for reordering master pages is not correctly mentioned in the Command Search result.  
(Ref - **1889**)
36. Saving a document in view only mode is missing.  
(Ref- **2427**)
37. MIF book parser fails to parse Unicode characters in file names.  
(Ref - **2514**)

Issues resolved

38. When a .slz file of 2015 release is imported in FrameMaker 2017 release, and a responsive HTML5 output is generated from it, the output does not appear correctly.  
(Ref - **2566**)
39. Renaming a project location adds unwanted characters in the location name.  
(Ref - **2421**)
40. The Smart catalog does not list the description along with the element name.  
(Ref - **2334**)
41. User interface issues noticed in the Sort Table dialog.  
(Ref - **1087**)
42. While publishing a document, if a paragraph style is mapped to <img> HTML tag, FrameMaker crashes.  
(Ref - **2422**)
43. Xerces versions 2.5.0 and 2.7.0 installed in Adobe FrameMaker 2015 version 13.x with update 5 is out of date.  
(Ref - **2102**)
