# Issues resolved

This section provides information on the following issues resolved in the latest RoboHelp (2017 release) Update 1.

1. If a dynamic filter is applied on a topic and that filter is set to hidden, the topic's index entry remains visible.  
(Ref# **295**)
2. A blank TOC is displayed when an output generated using the Indigo layout is opened by clicking on the "Show output in full context" link in Safari.  
(Ref - **263**)
3. Missing scrollbar noticed when responsive HTML5 output generated using the Indigo layout is viewed in Safari (Sierra OS).  
(Ref - **297**)
4. For the output generated using the Indigo layout, the title of the dynamic content filter panel does not appear as configured in the publish settings.  
(Ref - **345**)
5. In the Indigo layout, title of the add/remove favorite button does not change.  
(Ref - **386**)
6. Multiple customization issues noticed in the Ocean layout.  
(Ref - **288**)
7. When Show Default Topic option in the Ocean layout is turned off, then no topic is displayed when a link is clicked from the TOC.  
(Ref - **294**)
8. In the Ocean layout, no SVG image preview is displayed in the Banner tab.  
(Ref - **296**)

9. RoboHelp fails to import or link to a .fm file if FrameMaker (2017 release) is not running.  
(Ref - **332**)
10. When the responsive HTML5 output is hosted on RoboHelp Server 10, the TOC and Search fails to load.  
(Ref - **314**)
11. For the localized versions of RoboHelp, the Starter screen displays incorrect RoboHelp version number.  
(Ref - **352**)
12. Adding a link of a CSS file in another CSS file does not work as expected.  
(Ref - **284**)
13. When the “Show output in full context” link is clicked in the context-sensitive Help test tool or in Internet Explorer 11, a scripting error appears.  
(Ref - **303**)
14. Scripting error noticed while opening multi-screen HTML5 output.  
(Ref - **374**)
15. Some issues noticed in the sample projects shipped with RoboHelp.  
(Ref - **324**)
16. Large image pop-up appears for images that are marked as zoom-able.  
(Ref - **328**)
17. An error occurs while exporting a project to DocBook or exporting topics to DocBook format.  
(Ref - **341**)
18. RoboHelp fails to launch RoboHelp Screen Capture tool.  
(Ref - **351**)
19. In a particular case, generating Mobile App output throws runtime error.  
(Ref - **390**)
